Job Market Paper

Inflation Beliefs and the Indexation of Household Debt

with João Pugliese (Stanford University) and Lucas Iten (Central Bank of Brazil)

Abstract: The indexation of household debt contracts to consumer prices has long been proposed as a state-contingent alternative to conventional fixed-nominal contracts. By design, price-level-adjusted (PLA) debt offers lower initial installments — an advantage we document in loan-level data from the Brazilian credit registry — but generates a rising and uncertain path of future liabilities. Planning under these contracts requires households both to form inflation expectations over long horizons and to translate those expectations into their own future nominal installments. We conduct a survey experiment with PLA borrowers in Brazil featuring two treatment arms that separately target (i) inflation beliefs and (ii) the translation of beliefs into projected installments. Preliminary evidence shows that households substantially underestimate future liabilities even conditional on their own inflation forecasts, and that providing information about inflation alone is insufficient to correct installment projections or alter planned behavior. These findings raise broader questions about how inflation should be communicated to households and about the welfare consequences of PLA debt.

Fellowships and Awards

Merit-based Head TA Bonus, Duke University Economics Department	2023, 2025
Summer Research Fellowship, Duke University Graduate School	2022, 2023
Graduate Fellowship, CAPES (Brazilian Federal Agency for Graduate Education)	2019, 2020
Graduate Fellowship, Fundação Getulio Vargas	2018
Honorable Mention, Best Senior Thesis in Economics, University of São Paulo	2016

Teaching Experience

Duke University

TA, Advanced Microeconomic Theory (Undergraduate)	Fall 2026
Head TA, Introduction to Econometrics & Data Science (Undergraduate)	Spring 2025
Head TA, Econometrics & Data Science (Undergraduate)	Spring 2023
Head TA, Introduction to Econometrics (Graduate)	Fall 2022

São Paulo School of Economics – FGV

TA, Quantitative Macroeconomics (Graduate)	Fall 2019
